RE: ORV Permit Guidelines

Dear Ms. Carrington:

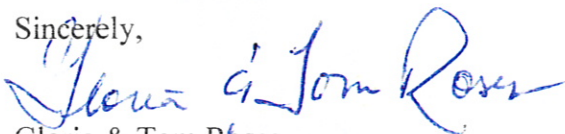

Allow me the opportunity to thank you again for your professionalism in handling my inquiry regarding the ORV permit guidelines. You sought specific information about my vehicle, you did not jump to conclusions and requested time to confer with your supervisor before responding to my request and you followed-up in a timely manner. I commend you for your leadership as well in advising that my input to the ORV Advisory Committee would help the committee consider refinement of the ORV Permit Guidelines in the future for users with different ORV specifications.

Please accept this letter as a request that ORV's such as ours, the Maxxam 150CC, 2WD, otherwise called a "Dune Buggy" be considered for addition to the vehicle list that defines what will be considered for an ORV permit. Most of these vehicles are assembled from kits, and as such do not carry a title as other UTV's do. I understand that there is a concern that these vehicles lack 4WD which could be a risk in the rainy season. I would proffer that to mitigate this risk, owners of this type vehicle be restricted to a permit for the dry season only.

My family and I have toured the various ecosystems of the Everglades by kayak, hiking and airboat. We would very much enjoy accessing Big Cypress with our Dune Buggy during the dry season and exploring the habitat from a very different vantage point.

Thank you for your consideration.

Sincerely,

Gloria & Tom Rbses

With ample power and precision steering, this Buggy can handle just about anything! Take it out for a quick spin in the dirt or for an all-day excursion. The Maxxam also comes well-equipped with bucket seats, headlights, large rear rack, reverse gear, parking break with light, 4-point seat belts and much more! Give the Maxxam a try, we think you'll agree that the Maxxam is well-deserving of its reputation as one of our most popular karts.

## DESIGNED BY EXPERTS

US Manufacturing Equals Unmatched Benefits

Throughout the years, Carter A.C.E. founders have grown a small manufacturing firm to a 235,000 square foot facility which houses management, sales, engineering, research and development, quality control, manufacturing, assembly and warehousing. Laser technology, robotic welding, powder coating finishes, and computer assisted designs are all a part of today's manufacturing process.

## General Specifications:

• 150cc 4-Stroke, Air-Cooled, Electric Start

#### Owner's Manual

FREE: **6 Month Warranty Protect Plan**, when you buy from GokartsUSA, **covers Parts, Labor and Roadside Assistance!!!** extendable up to 2 years (see product options above)

Warranty Protect adds value through:

Peace of mind - no out of pocket expense to the consumer for repair costs on covered items.

Convenience - we provide pick-up and delivery of the disabled vehicle (50 mile limit) to one of our local professional network technicians through our national towing network or if you prefer you may deliver it in person.

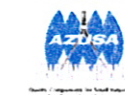

Technology - by utilizing state-of-the-art technology to assure service exceeds customer expectations.

Limited Warranty Coverage - 6 months (180 days) from date of purchase WP coverage includes parts, labor and roadside assistance, if needed, for your registered A.C.E. Sports product. This is a zero deductible plan that insures you the best service after the sale.

Items Not Covered - Wearable parts such as tires, belts, hoses, pulleys, sprockets, chains, clutches, throttle cable, brake cable, seat, fasteners, air filters, brake pads, oil changes & any item that has been abused, neglected OR used in a manner for which it's not designed. Modifications to your product that are not A.C.E. Sports approved will void the warranty. Defective parts are subject to recall by Warranty Protect and/or A.C.E. Sports upon failure and are required to be held by the service center until the warranty claim is settled. Our go karts, atvs & buggies are designed for off-road use only.
